Task Performed in this week :

- Started extracting a feature vector from each and every video which is termed as bag in our MIL approach using C3d model
- Did some basic data processing for the feature extraction processing.
- Faced some issues of getting out of memory which was further resolved by allocating and deallocating memory of variables.

Outcomes :

- We have got a text file of the extracted features as output from c3d model after the feature extraction.

Tasks to be performed next :

- We will use this feature vector for the training of our model.
- Gaining insights about the model
